\$250 to plow if you want the snow pushed back and shoveling the sand barrels.

\$200 if you just want a standard plow.

Thanks,

Wetty

Wetty,

Thanks for the call on Friday. No problem about any delays -- if I wanted work done by June, I should have worked out the details with you while there was still snow on the ground.

Also, I still need to get the full plow quote, too. Details follow my signature.

- Mike

Plow quote:

Quote for:

- a) Plowing when I'm out of town and,
- b) Figuring out how to share expenses with neighbors when I handle the plowing.

Details:

- Full plow job, including winging back the edges to prepare for future storms.
- Two turnarounds (bottom of hill, halfway up Peboniwi), pushed 5-10 feet back off the road.
- Dig/plow out four sand barrels.
- Includes any additional charges for sand and/or chains. Even with studs, I need chains about half the time.

I'm going to do most of the plowing, and then will recommend that we stick with Wetty's as long as your quote is in the same ballpark as the other professional quotes.
